| Accumulated Interest on Investments | 1,818 15 |
| TOTAL ASSETS | $349,157 14 |
| Liabilities, being unadjusted losses, and those not due | $14,550 00 |

The foregoing statement presents such a view of the Company's position as must impress the conviction on the minds of all, of its solvency and healthy condition. The amount of its Liabilities are less than Companies doing so large and extensive a business generally show—"no long and large list of unpaid losses," as a set-off against accumulations are seen here.

If, therefore, you want Insurance in a first class Insurance Company, go to the "Phœnix Insurance Company" through any of its authorized Agents, and you will find just what you desire.

# PREFACE.

It will be obvious to many that the size of the present Directory is somewhat smaller than the one published a year ago. This is accountable to the absence of Cincinnati advertisements, and the history of Indianapolis, which has now become generally known. With regard to the list of names, we have only to say, that there is an increase of about 1,500 over that of last year's publication.

In the first edition of a Directory, some few errors will necessarily occur. In the canvass for this work we had difficulties to contend with, which, in all probability, will be obviated in our next issue. For such imperfections we claim the indulgence of our patrons, with the assurance, that in future we will strive our best to guard against them.

There are a few instances in the city where the number on the houses do not agree with those designated in the Directory, which is accounted for by the numbering being changed after going to press. This is an evil over which the publisher had no control, and he hopes citizens generally will exonerate him from all blame.

Many thanks are due to those who have advertised in the work, thereby benefiting themselves, and aiding very materially the undertaking. We trust the manner in which their cards are displayed will prove satisfactory.

The work was printed and bound by Messrs. Bingham and Doughty, of the Sentinel, whom, we feel assured, will receive all the praise and approbation due to their efforts.

In conclusion, the book is thrown upon a generous public, with the hope that it may meet with the satisfactory reception which the publisher has labored to achieve.

## INDIANAPOLIS, IND.

The facilities for acquiring a thorough business education at this School have been increased till now unsurpassed. The room is one of the largest and best ventilated in the west, and in addition to the teachers formerly connected wiih the School. we expect to secure the services of a gentleman who has had over twenty years' experience as a merchant and active business man. The regular lecturers hereafter will be Dr. R. T. Brown, Geo. K. Perrin, Esq., John Coburn, Esq., and the Principal, each of whom are well known.

The large number graduating at this school the past year has far surpassed every expectation, while nine-tenths of them are in good business, and fully establishes the assertion that it is not only the cheapest, but most thorough School in the west.

Each pupil, on bearing satisfactory examination, will receive a Diploma that is acknowledged to surpass any in the Union. The original design of which (may be seen at all times at our room) cost us months of labor.

The course of studies embraces not only Book-Keeping, but all the connecting branches, such as Penmanship, Mercantile Arithmetic, Mercantile Correspondence, detecting counterfeit Money, &c., with daily lectures on Mercantile Law, and such subjects as are essential to every man.

Terms for complete course, with right of reviewing at pleasure, $25 00.

T. J. BRYANT, Principal.

### Vacation from July First to September First.

The undersigned being personally acquainted with Prof. T. J. Bryant, and his general character as a Teacher and Penman. feel satisfied that he thoroughly understands his business, and will accomplish all he promises; and we cheerfully recommend his Institute to all who wish the aid of an experienced teacher, or to acquire a complete business education.

# DENTISTRY.

## DR. S. C. FRINK

Takes pleasure in informing his friends and the public that he is to be found at his office, No. 8 East Washington street, from 8 A. M. to 6 P. M., prepared from his long experience in the practice of Dentistry, to insert Artificial Teeth on Gold, Silver or Platina, with his Improved Continuous Gums, which combine the following advantages:

WITHOUT TEETH.

WITH TEETH.

*First.*—Pure Platina has a specific gravity greater than pure gold, and is consequently more dense. Its resistance to acids is greater even than that of gold, and undergoes no change from the combined agency of air and moisture. It may also be exposed to the strongest heat of a Smith's forge without suffering either oxidation or fusion.

For Artificial Dentistry, it has no equal in the list of metals; being sufficiently strong to use without alloy, and not in the least acted upon by the fluids of the mouth. In fact, no other metal will resist the action of so powerful a heat as is required to fuse upon it the "*Continuous Gum Work.*"

*Second.*—There are no seams or crevices for the lodgment of food, to vitiate the saliva, or to infect the breath. The interstices are all filled with a silicious compound, which is so applied as to form an Artificial Gum; this is fused at a high heat, which unites the Teeth firmly to each other, and to the plate upon which they are set, thus imparting great strength and life-like appearance to the denture.

*Third*—The Teeth for this style of work are made perfectly natural in form and shade, and when properly set with the Artificial Gum, as above, exhibits that harmony with the other features, which characterize the natural organs.

*Fourth.*—The original form and expression of the mouth and face can be restored. (See cuts.) This is done by having the denture so constructed as to bring out the sunken portions and sustain them in their proper position; this is an important feature in this style of work, to which he devotes particular attention. (*Continued on page* 180.)

Werbe Christ. G., clerk Post Office, res. 53 S. Pennsylvania.
Werbe Lewis F., grocer, 185 W. Washington, res. same.
WERDEN & CHAMBERLAIN, books and stationery, 26 E. Washington.

*Fifth.*—A clear and distinct articulation of speech is restored. This is effected by having the inside of the teeth and artificial gum of a natural form, to which the tongue is readily adapted; this prevents the hissing or muffled sounds so often observed in speaking or singing, in persons wearing artificial teeth.

*Sixth.*—Heretofore they have been somewhat objectionable on account of their weight, and the gum being formed so thick on the inside as to make them cumbersome. By a series of experiments he has succeeded in entirely removing these objections.

PLATINA PLATES MADE IN EXCHANGE FOR GOLD.

Those wearing sets upon gold, and desiring "*Continuous Gum Work*," with a view of having *the form of the face restored*, and of obtaining a natural expression, cleanliness, &c., can make this exchange with the advantage of a liberal deduction from the usual charges.

Teeth inserted from one to a whole Set, in every style known to the profession, and as cheap as good work can be done, and warranted to perform all that is promised.

Office hours from 8, A. M., to 6, P. M.

Ladies and gentlemen are invited to call and examine specimens.

N. B.—The very best reference given when required.

# TOOTH POWDER,

**FOR REMOVING THE TARTAR, CANKER AND ALL FOREIGN SUBSTANCES INJURIOUS TO THE TEETH AND GUMS.**

The greatest perfection attained in the composition of any Tooth Powder is —

*First*—To thoroughly cleanse the mouth.

*Second*—To remove from the teeth the acids, which cause their decay.

*Third*—Not only to preserve the teeth but to restore perfectly the natural brilliancy of the enamel.

To enable the inventor of this powder to attain this perfection, the fluids of the mouth were most carefully analyzed, and a composition prepared, which for more than ten years has proved itself "a perfect cleanser, second to none." For neutralizing all acids in the mouth, removing all accretions from the teeth and giving health to the gums, it is unrivaled. The public may rest assured that it contains no acid or other substance in any way injurious to either the teeth or gums. A volume so testimonials might be adduced, but none can be offered which will prove so satisfactory as the actual use of the article, and Dr. F. cheerfully submits it to this TEST.

Wm Tinsley, Architect

NORTH WESTERN CHRISTIAN UNIVERSITY, INDIANAPOLIS, INDIANA.

# North-Western Christian University.

## LOCATION.

This institution is located in Indianapolis, Indiana, about one mile and a half north-east of the Governor's Circle. The College campus contains twenty-five acres, covered with primitive forest trees. Its seclusion from the city, its healthfulness and its forest beauties render it one of the most desirable locations for such an institution of learning, in the West.

## BUILDING.

The University edifice is of the most substantial and elegant collegiate Gothic style. The part now finished is four stories high, facing south and east, about one hundred and five feet each way, and affords ample accommodations for about three hundred students. The walls are of stone and brick, put up under the supervision of Mr. Wm. Tinsley, architect.

## HISTORY.

The act incorporating the North-western Christian University was obtained from the Legislature in 1850. It is formed on the joint stock principle. One hundred dollars constitutes a share, and the stockholder is a preferred borrower of the endowment fund, to the amount of two-thirds of his stock, by making it secure, and paying interest thereon annually the first of May, at the rate of six per cent. The stockholders receive an annual interest on all their stock, (which is paid or secured,) of six per cent., in tuition scrip, which is good for its face in the payment of tuition fees in the institution.

The charter required that seventy-five thousand dollars of stock should be subscribed before the company could organize. This amount was obtained principally through the efficient agency of Eld. John O'Kane, by the spring of 1852, when the first board of directors was elected.

In the spring of 1855 the preparatory department was opened by Prof. A. R. Benton, and in the fall of the same year the College proper was opened, with literary and legal departments. The faculty was then composed of

*Acting President, and Professor of Natural Science and Law*, John Young, A. M.
*Prof. of Ancient Languages*, A. R. Benton. A. M.
*Prof. of English Department*, J. R. Challen, A. M., with the necessary assistants.
*Prof. of Modern Languages*, S. K. Hoshour.
*Prof. of Music*, I. K. Pearsall.

At the annual meeting of the board in July, 1858, Professor Young having resigned his professorship, the faculty was recomposed as follows:

## FACULTY.

*President, and Prof. of Ethics, Moral and Mental Science, and Modern Languages*, S. K. Hoshour, A. M.
*Prof. of Ancient Languages*, A. R. Benton, A M.
*Prof. of Mathematics*, G. W. Hoss, A. M.
*Prof. of Natural Sciences*, R. T. Brown, A. M.
*Prof. of English Department*, I. R. Challen, A. M.
*Tutoress in Primary Department*, Mrs. E. Price.

## LAW DEPARTMENT.

There is also a law school in connection with this institution, which will be opened, with a full law faculty, on the first Monday in November, 1858.

## OBJECTS.

The aims of the institution are to graduate students in literature, in science, and the learned professions, and to exert a wholesome moral and religious influence over all its students. The charter makes the Bible the only book of authority in religious instruction, and "discards as uninspired and without authority all writings, formulas, creeds, and articles of faith subsequent thereto."

As a means of moral and religious instruction, the exercises are opened every morning with Bible reading and prayer, and each teacher hears a Bible recitation every Monday morning.

The success of the institution, thus far, has been very gratifying to all its friends and patrons. The number of its students has increased regularly from its very commencement, the number in attendance the present session being much larger than at any previous time, which speaks well for the future prosperity and usefulness of the North-western Christian University.
